

Sacramento Area Sewer District
Sanitary Sewer Overflow (SSO) Response Procedures

Effective: 1/15/2009 Revised 12/12/2008 Supersedes 3/29/08

11. SSO Response Charge Codes

Use of Charge Codes

There are the following categories of cost roll-ups SASD is collecting for SSOs and BISs. The purpose of this separating into categories is to collect costs that are above and beyond SASD's normal response to these events. The categories are:

- Large Events (SASD staff involvement spans more than one day and have more than one cost center involved. Does not apply to Risk Management & George Hills BIS restoration work)
 - Cause of SSO or BIS in private (non-SASD) or SASD line – use sequential code set aside for special events – Contact Candy Neal or Steve DeLozier to get the next sequential number (i.e. Emergency Event X)
- All other events
 - Cause of SSO or BIS in SASD pipe
 - Service Request is part of normal operations – and charges the same as any non-SSO/BIS service request
 - Work Orders to determine responsibility for cause of SSO/BIS and to clean-up charge to SASD Overflow Response (i.e. CS_017)
 - Cause of SSO or BIS in private (non SASD or SRCSD) pipe
 - Service Request is part of normal operations – and charges the same as any non-SSO/BIS service request
 - Work Orders to determine responsibility for cause of SSO/BIS charge to SASD Overflow Response (i.e. CS_017)
 - Work Orders to clean up a private cause SSO or BIS charge to Private Overflow Response.
 - Cause of SSO or BIS in SRCSD pipe
 - Service Request is part of normal operations – and charges the same as any non-SSO/BIS service request
 - Work Orders to determine responsibility for cause of SSO/BIS charge to SASD Overflow Response (i.e. CS_017)
 - Work Orders to assist in containment, clean up or anyiother support as requested by SRCSD from a SRCSD system caused SSO or BIS charge to SRCSD Overflow Response.
 - When Called to respond to SSO or BIS in General Services, Airports and Parks systems:
 - Service requests and work orders all charge to these entities as shown below. (Note: The service request is handled differently
