

## **PROCESS FOR AMENDING SACRAMENTO AREA SEWER DISTRICT SEWER SYSTEM CAPACITY PLAN TRUNK SHED BOUNDARIES**

The following process is to ensure adequate review and documentation of a proposed amendment to the Sewer System Capacity Plan (SCP).

1. The developer/engineer (originator) prepares a brief description and justification for the proposed shed shift amendment and submits the completed SCP Permanent Shed Shift Form and supporting documentation. The supporting documentation includes the following documents:
  - Current SCP exhibit(s) and related tables
  - Proposed changes to facilities and updated tables
  - Summary of changes including peak wet weather flow, ESDs, etc.

Please submit the proposed shed shift application in PDF to:  
*sasdevservices@sacsewer.com*

The application will be routed internally for review. The originator will be notified upon approval or denial.

Please contact Yadira Lewis at (916) 876-6336 with any questions.
